Agilitech Changes Its Name to **UT³**

UT³ modernise IT services in ways people often haven't thought of. We find low impact, high value opportunities that free budget and resource and enable businesses to Unlock Tomorrows Technology Today.

With innovative solutions for PC-as-a-Service, Print Management & Digital Documents we improve end user satisfaction, find environmental and security improvements, and we free up time and money that our clients use to drive other strategic IT projects.

Our former name launched the business in 2022, however a trademark issue came to light which made us take the time to reflect on who we are and what it really is that we're doing for our clients.

Driven by a relentless pursuit of excellence and a passion for pushing boundaries, UT³ has reimagined its brand identity to resonate with the difference we're really making. With a focus on finding hidden value that unlocks other IT investment opportunities, the new brand identity encapsulates the essence of UT³, Unlocking Tomorrow's Technology Today.

"We are incredibly excited to unveil our new brand identity, which reflects what we do for our customers," said Stuart Cassidy, Head of Business at UT³. "At UT³ we are dedicated to shining the light into the shadows of IT services and finding that hidden value. We put the right tools in the right hands, increasing productivity, security and sustainability whilst delivering savings. This rebranding highlights our commitment to making a real difference to our clients."

We're empowering IT teams

OUR STORY

Our founders believe that businesses are being held back by legacy IT expenditure, that in many cases is not even on the radar.

It inspired the birth of UT³. We exist to put this right and help businesses unlock tomorrow's technology today.

It started with a "Why?"

As UT³ continues to grow we took the time to ask: With so many strategic IT projects on the agenda, why are people making time to see what it is that UT³ can do for them?

The common theme was that the ROI was impossible to ignore. We make small changes that bring big benefits. We'll modernise IT services that, with all the major transformational projects on your plate, you won't otherwise find the time to.

We'll improve end user satisfaction, find environmental and security improvements, and we'll free time and money that you can use to drive those other strategic projects.

What we do

We offer innovative solutions for PC-as-a-Service, Print Management & Digital Documents. In partnership with HP, and others, we deliver cutting-edge PCs, printers or digital document software tools where you need them most. Together, we manage, enhance and simplify your work environment.

Save costs by putting the right tools in the right hands, to increase profits, business agility, security and sustainability.
